The Refresh'R is WaterFleet's revolutionary solution to the problem of worksite hydration. Safe, compliant drinking water delivered "kiosk" style at the OSHA approved temperature, all without the need for coolers, ice, and trucking. The Refresh'R, backed up by WaterFleet's water production and refill service, puts drinking water where it is needed with significantly less hassle and waste, for a competitive cost.

ABOUT WATERFLEET

WaterFleet is a best-in-class service provider of mobile water and wastewater utility services, and workforce relief solutions.

Using our state-of-the-art proprietary technology and trained technical staff, we solve human water needs in places where water and wastewater utilities are not available.

Managed Distribution

WaterFleet services provide as many Refresh'R's as you need and locates them for your population's convenience. They are maintained and refilled by WaterFleet personnel, so that safe water, at the right temperature, is always there. This solution removes the burden of water distribution by the company, simplifying the workload while providing peace of mind.

- 💧 Can be directly supplied or use WaterFleet refill service
- 💧 Designed for placement in remote locations or any work location needing drinking water distribution
- 💧 On-site routine testing included

Safety as a Priority

With Refresh'R services, water stored in the kiosk is secured and protected from the environment. WaterFleet assures that the storage system is always clean and provides testing to verify compliance and safety. When coupled with the Water Rig services, WaterFleet produces and distributes the water, further ensuring safety and compliance.

- 💧 Reduces health risks and costs significantly less than alternatives
- 💧 Meets all OSHA and EPA safe drinking water standards
- 💧 Easy movement by forklift or crane

CLEAN WATER. WHERE YOU NEED IT. WHEN YOU NEED IT.

Simple and Effective

WaterFleet's unique hydration services replace bottled water or water cooler trucking, distribution around the site, waste from partial use, and daily cooler or trash collection. The Refresh'R method is simple and effective and fully managed by WaterFleet personnel.

- 💧 Easily transportable and deploys rapidly
- 💧 Quality controlled water
- 💧 Provides positive ESG impact

How it Works

- 💧 WaterFleet's specialized technicians generate highly-quality, compliant drinking water on-site with the Water Rig or can use an existing verified potable water source
- 💧 Our technicians safely transport the water on-site and refill each Refresh'R, the unique self-serve, water kiosk (touchless option available)
- 💧 Your team has access to clean, cool, safe water at the work location – wherever there is a 110v power supply

We're ready to deploy 24/7.
