FLEX-TECH™ MODULAR WASTEWATER TREATMENT SOLUTIONS

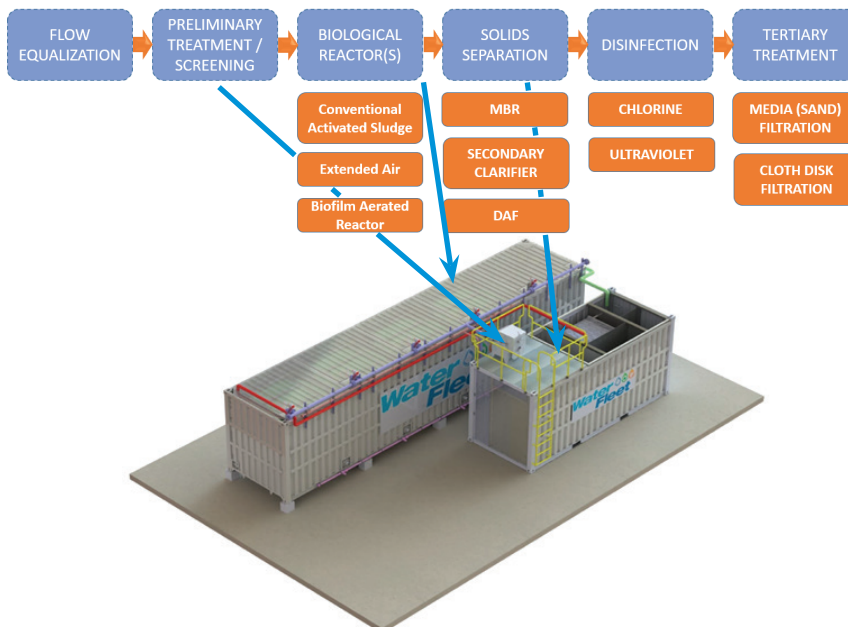

We customize our solutions for your project, with flexible options to meet the scope of your needs. Developers and small communities are moving to decentralized treatment systems that are an easily affordable and practical alternative to traditional delivery methods.

FLEX-TECH™ ADAPTABLE TECHNOLOGY INTEGRATION

WaterFleet continues to pioneer decentralized water and wastewater treatment solutions with the introduction of its Flex-Tech™ universal building block technology. Each building block can incorporate a vast array of treatment processes, that when combined, offer the most efficient approach for your project needs. Preference for a particular process, budget constraints, energy efficiency goals, challenging input streams, or stringent product water limits are easily accommodated. Flex-Tech™ allows for customizable solutions that are reliable, modular, and expandable to meet the requirements of the stakeholder.

WaterFleet Flex-Tech™ Innovative Building Blocks

We work with you to determine the most cost-effective wastewater treatment solution, using proven technology that is robust and reliable, to ensure that your wastewater meets or exceed regulatory requirements.

WHY WATERFLEET

- Cost-effective
- Streamlined process
- Guaranteed cost and performance
- Numerous financial solutions
- Worry-free

CUSTOMER-FOCUSED APPROACH

- Rapid installation
- Minimal on-site construction
- Leasing minimizes capital requirements
- Space-efficient
- Modular systems are scalable
- Capacity can be added in phases as requirements grow
- Reuse ready
- Operator-friendly
- Accommodates flow and load fluctuations
- Increased reliability
- Minimal maintenance

DESIGN

- Innovative proven technologies
- Tailored to meet your needs
- Modular – add capacity as demand increases
- Reduced Energy Consumption
- Advanced Treatment
- Designed to meet permitted effluent requirements
- Lower Sludge Production
- Integrated Odor Abatement
- Easy Operation
- Long, useful life

BUILD

- Plant installation included

LEASING AND FINANCE

- When compared to traditional delivery methods our programs require only a small installation fee and low monthly payments.
- Leasing allows for retained capital while meeting immediate needs

Leasing Options

- Variety of sale and leasing options, as well as leasing with the option to purchase.
 - Short-term Rental
 - Interim Lease
 - Long-term Lease
 - Lease, with purchase options

Sales and Financing

- Installment Sale
- Straight Purchase

Flexible Terms

- After lease term, lessee has several options:
 - Continue to lease
 - Exercise purchase option
 - Construct the ultimate treatment solution and terminate the lease

OPTIONAL SERVICES

- Permitting assistance
- Compliance reporting assistance
- Full-suite sonar command and control operations platform
- Equipment repair
- Replacement parts
- Asset management assistance
- Extended warranty packages

ABOUT WATERFLEET

WaterFleet is a best-in-class service provider of mobile water and wastewater utility services, and workforce relief solutions.

Using our state-of-the-art proprietary technology and trained technical staff, we solve human water needs in places where water and wastewater utilities are not available.

AVAILABLE TREATMENT TECHNOLOGIES

- Activated Sludge
- Biofilm Aerated Reactor (BAR)
- Membrane Bio Reactors (MBR)
- Sequencing Batch Reactors (SBR)
- Moving Bed Biofilm Reactors (MBBR)
- Dissolved Air Flotation (DAF)
- Biological Nutrient Removal (BNR)
- Chemical Phosphorous Removal
- Tertiary Treatment

All treatment solutions can be designed to provide reuse quality effluent, including Title 22

“THE BRIDGE”

WaterFleet has developed a proprietary, industry-leading enterprise IoT solution

- Centralized Command Center for remote operations, data analytics and technical support
- Remote command and control of operations
- Operational insight enables instant decisions
- Plant, equipment & technical troubleshooting 24/7/365
- Real time alarm monitoring and optimization
