

DECENTRALIZED WATER TREATMENT SOLUTIONS

POWERED BY WATERFLEET FLEX-TECH™

MODULAR WATER TREATMENT SOLUTIONS

WaterFleet is a best-in-class equipment and service provider of water treatment solutions. Developers and small communities are moving to decentralized treatment systems that are an easily affordable and practical alternative to traditional delivery methods. Our equipment provides millions of gallons of verified potable water to thousands of people every month.

We customize our solutions for your project, with flexible options to meet the scope of your needs.

Water Treatment Applications:

- Drinking water
- Desalination Arsenic removal
- Process water
- Ultrapure water and NOx reduction
- Irrigation water

Source Water Applications:

- Groundwater
- Surface water
- Seawater
- Brackish water
- Contaminated streams (PFAS, arsenic, nitrates, etc.)

ADAPTABLE TECHNOLOGY INTEGRATION

WaterFleet continues to pioneer decentralized water treatment solutions with the introduction of its Flex-Tech™ universal building block technology. Each building block can incorporate a vast array of treatment processes, that when combined, offer the most efficient approach for your project needs.

We work with you to determine the most cost-effective solution, using proven technology that is robust and reliable, to ensure that your water meets or exceeds regulatory requirements.

WHY WATERFLEET

- Cost-effective
- Streamlined process
- Guaranteed cost and performance
- Numerous financial solutions
- Worry-free
- Capacity can be added in phases as requirements grow
- Turnkey Delivery
- Rapid Installation
- Minimal On-site Construction
- Increased Reliability
- Minimal Maintenance
- Operator-Friendly
- Space efficient
- Leasing minimizes capital requirements

WaterFleet Flex-Tech™ Innovative Building Blocks

Physical	Chemical	Membrane Treatment	Tertiary Treatment
<ul style="list-style-type: none"> • Sedimentation • Screening • Aeration • Particle Filtration • Activated carbon • Floatation/skimming • Equalization 	<ul style="list-style-type: none"> • Chlorination • Ozonation • Neutralization • Coagulation • Adsorption • Ion exchange 	<ul style="list-style-type: none"> • SWRO • BWRO • MF/UF • NF 	<ul style="list-style-type: none"> • Disinfection • Chemical conditioning • Remineralization • Residual maintenance

DESIGN

- Innovative proven technologies
- Tailored to meet your needs
- Modular – add capacity as demand increases
- Advanced Treatment
- Easy Operation
- Long, useful life

BUILD

- Plant installation included

FINANCE

- When compared to traditional delivery methods our programs require only a small installation fee and low monthly payments.
- Leasing allows for retained capital while meeting immediate needs.

Leasing Options

Variety of sale and leasing options, as well as leasing with the option to purchase.

- Short-term Rental
- Interim Lease
- Long-term Lease
- Lease, with purchase options
- Installment Sales

Flexible Terms

After lease term, lessee has several options:

- Continue to lease
- Exercise purchase option
- Construct the ultimate treatment solution and terminate the lease

OPTIONAL SERVICES

- Permitting assistance
- Compliance reporting assistance
- Full-suite sonar command and control operations platform
- Plant and equipment troubleshooting
- Equipment repair
- Replacement parts
- Asset management assistance
- Extended warranty packages

THE BRIDGE: THE WATERFLEET ADVANTAGE

WaterFleet has developed a proprietary, industry-leading enterprise IoT Solution

- Centralized Command Center for remote operations, data analytics and technical support
- Remote command and control of operations
- Operational insight enables instant decisions
- Plant, equipment & technical troubleshooting 24/7/365
- Real time alarm monitoring and optimization
